

International Journal of Information and Education Technology

CONTENTS

Volume 14, Number 9, 2024

- Exploring the Potential of Immersive Technology for Virtual Teaching and Learning: A Metaverse Conference Experience 1185
Paul Lam and Vanessa Kiu
- Application of Artificial Intelligence as a Tool for the Continuous Improvement of Higher Education Courses 1192
Karina G. Coronado-Apodaca, Maria M. González Pérez, Ernesto Reyes Villegas, and Luis Virgen Navarro
- Effectiveness of Augmented Reality with Cognitive Conflict Model to Improve Scientific Literacy of Static Fluid Material 1199
Fatni Mufit and Muhammad Dhanil
- Web 2.0 Personal Learning Environments for Development University Teacher Competencies 1208
Gani Issayev, Zhanat Yergubekova, and Sattibay Aitbayev
- Continuance Intention to Use Gamified Mobile Apps for English Speaking Skills Learning in Chinese English as Foreign Language (EFL) Higher Education..... 1217
Kehan Du, Maslawati BT. Mohamad, and Azizah BT. Mohd. Zahidi
- Enhancing Occupational Health and Safety Education: A Mobile Gamification Approach in Machining Workshops 1227
Aprilla Fortuna, Febri Prasetya, Agariadne Dwinggo Samala, Welli Andriani, Soha Rawas, Amri Ramadhan S., Hua Chai, Mirko Compagno, Saba Abbasinia, and Rahmat Azis Nabawi
- Enhancing Geometry Teaching in STEAM Education with Interactive Learning Environments 1239
Makpal Dildabayeva and Lyazzat Zhaydakbayeva
- Exploring College of Education Students' Perceptions of the Educational Uses of Virtual Reality (VR) Technologies 1252
Budour M. Almisad, Ayda A. Aleidan, and Rabab D. Alsaffar
- The Effectiveness of Digital Module Based-POE (Predict-Observe-Explain) with Computer-Assisted Feedback to Improve Student Understanding of Physics Concept 1262
Hidayati Hidayati, Putri Dwi Sundari, Wahyuni Satria Dewi, Defrizal Saputra, Nabilah Ikrimah Ayani, Elarismoy Beporta Anusba, Renol Afrizon, Fuziya Anggraini, and Fanny Rahmatina Rahim
- AI Meeting Assistants in English-Medium University Lectures in Hong Kong, China: A Double-Edged Sword for Student Perception 1271
Alex Pak Ki Kwok, Yao Hing Wong, Kwong Cheong Wong, and Chee Hon Chan

Predicting the Professional Field of Students Using Data Mining: A Case Study of an Autonomous University in Thailand.....	1277
<i>Phichayasini Kitwatthanathawon</i>	
Blended Learning in the Digital Skills Module: Insights from Students' Perceptions	1285
<i>Youness Hamzaoui, Youssef Menchafou, Morad Aaboud, Nadir El Morabit, Mohammed Chekour, and Nabila El Azzouzi</i>	
Development of WIV-S Physics e-Learning to Improve Inquiry Abilities and Digital Literacy of Prospective Science Teacher Students.....	1291
<i>Iwan P. Suwarna and Zulfiani Zulfiani</i>	
Evaluating System Usability and Acceptance of a Quiz Based Augmented Reality Interaction for Learning Solutions of Electrical Motor	1299
<i>Yih Bing Chu, Yong Cai Zhang, and Hor Yeng Wong</i>	
Impact of 'Help! Serious Game' on Motivation and Achievement: A Study on Undergraduate Students Majoring in Special Education.....	1306
<i>Anas Hanandeh, Samer Ayasrah, and Wafaa Al Eid</i>	
The Authentic Blended Assessment Model of Basic Reading for Developing Self-Directed Learning Skills.....	1317
<i>Yulmiati, M. Zaim, and Atmazaki</i>
